

CROKING

The first token with

5% CRO rewards on cronos chain

TABLE OF CONTENT

Cronos is uniquely positioned as an EVM chain on Cosmos, which allows them to have interoperability at their core. We envision that as the Cronos bridge evolves, it will unleash a whole new dimension of cross-chain value transfer between multiple EVM and Cosmos-based chains.

ROADMAP

ABOUT US

CroKing is a multifacet utility token which uses the Hype of Cronos Chain which provides a fresh start for many crypto investors away from the regular BSC and ETH dominance and gives holder **5% Cro Rewards**. CroKing is the first hyper reward token on the cronos chain. With a one of its kind 100% rug, Honeypot, scam free launchpad in development, an NFT Marketplace which will house hidden gems and precious collectibles, as well as a staking system to reward CroKing holders.

Our aim is to provide Investors a solid platform to not only purchase tokens but to also safeguard their funds and also rewarding them in the process using the fresh grounds of the cronos chain.

LAUNCHPAD

With the current craze of rugpulls scams and all sorts of honeypots. We're Developing a one of its kind launchpad which will safeguard our users, investors and holders from being scammed, as we will take stern measures to making sure any project that must launch using our launchpad is 100% rug, scam or Honeypot free, as we'll send out our Devs and Officials to look through their contract, check through their Community, check through how useable their products are and verify their doxxed documents for a KYC. We will partner as well with the best audit firms which we will highlight for these projects using our launchpad to go through, providing stern measures to making sure we have a 99.9% rug, scam or Honeypot free launchpad, as our core aim is to protect and safeguard the funds and interest of our investors, holders and users.

NFT MARKETPLACE

We're Developing a dapp which at first we'll release rare Nft boxes which once opened you can stake one or those collectibles to gain multiple Rewards. There are 3 rare levels with each having unique Nft collectibles.

STAKING SYSTEM

Aside giving our investors reflections in \$CRO we have set out a good percentage of tokens to reward holders who are willing to take on this journey with us, with some heavyweight staking rewards that will be worth a good fortune, we will pride ourselves as a strong Community project that rewards strong holders and believers
