

CROKING

The first token with

5% CRO rewards on cronos chain

TABLE OF CONTENT

Cronos is uniquely positioned as an EVM chain on Cosmos, which allows them to have interoperability at their core. We envision that as the Cronos bridge evolves, it will unleash a whole new dimension of cross-chain value transfer between multiple EVM and Cosmos-based chains

ROADMAP

ABOUT US

CroKing is a multifunctional utility token which utilizes the speed and versatility of the Cronos Chain to provide investors with one of the most exciting opportunities for passive earnings. Holders will receive wrapped CRO multiple times per day (based on number of owned CRK, and system volume), just for having CRK in their wallet. Meanwhile, CRK will offer an NFT marketplace and a launchpad for emerging projects which will feature anti-rug pull protections, so investors can operate with confidence.

Other features include: token supply cap, Doxxed developers, cleared Audit, anti-whale wallet size limits, and an enthusiastic community with open communications with the development team.

LAUNCHPAD

Due to the substantial increase in rug-pulls, honeypots, and other types of scam projects, we are developing a one of a kind token launchpad. This platform will safeguard potential investors from having their funds misappropriated by nefarious developers. With an in-house team of developers and assessment techs we will be ready to thoroughly inspect every element of each project that seeks to launch on our platform. By providing auditing, KYC, and assessment services we will not only be minimizing risk for investors but also provide valuable insight and setting a new standard for projects launching in the crypto space. Not just a launchpad, it's a launchpad with principals.

NFT MARKETPLACE

What do people like more than NFTs? NFTs with utility! We are developing a platform to buy, sell, and trade NFTs but more importantly it's a platform where we will launch our own special products. Wondrous surprises await you in our first line of NFTs contained in Mystery boxes. From NFTs that can be staked for increased rewards to 3D Multi-Verse assets that can be utilized for rapport or incentives, only time will tell what we will release onto the marketplace for purchase.

STAKING SYSTEM

While getting \$CRO rewards is awesome, we have decided we want to do just a little bit more for our investors. We set aside a portion of the supply to provide strong staking rewards for those who are along for the journey with us. We take pride in our strong and supportive community so we want to reward all our diamond hand holders and unbreakable supporters.

TOKENOMICS:

One Quadrillion CroKing
1,000,000,000,000,000 CRK
