CROKING

The first $CRO Rewards token
On the Cronos Chain

Introduction

- Welcome to CroKing, created as a decentralized finance (DeFi) solution on the Cronos chain. Since inception, CroKing has been evolving into an expanding multi-chain ecosystem designed to grow your $CRO token holdings through our in-house token $CRK, used in conjunction with CroKing's user-friendly decentralized application (DApp).

- CroKing launched their initial token $CRK on January 11th, 2022, with a One Quadrillion (1,000,000,000,000,000) max supply as the first $CRO rewards token on the Cronos Chain. This was followed by their second token $CRQ with also One Quadrillion (1,000,000,000,000,000) max supply.

- To grow & integrate into new protocols, CroKing started migration on December 28th, 2022, from their original tokens $CRK V1 & $CRQ to their new current token $CRK V2, with a max supply of one million two hundred thousand (1,200,000) max supply.

- While rewarding users with $CRO remains at the roots of the project, CroKing believes in offering flexible earning opportunities tailored to the community's needs. Historical data has shown that CroKing provides a competitive earning solution that consistently outperforms alternatives such as validator staking.

INTRODUCTION

- The CroKing team's commitment to development has earned CroKing top-tier status on the chain, propelling the project into the position of a trusted O.G. among the Cronos community. What started as a token is quickly morphing into a decentralised One-Stop Shop.

- For more detailed information on our products and offerings, please consult the entirety of this document.

Current Ecosystem

- **CRK Token V2**

- **Non-fungible tokens (NFTs) & NFT Marketplace**

- **Coin Flip**

- **$CRK Boosted Staking & NFT Staking**

- **Decentralized Exchange (DEX) Aggregator**

- **Merchandise**

CRK Token V2

- **Token Name:** CroKing

- **Symbol:** CRK

- **Blockchain:** Cronos

- **Contract Address:** 0x7C8b5.....Fa1Fc4F

- **Total Supply:** 1,200,000 CRK

- **Tokenomics:**

  - **Buy Tax: 7%**
    (Liquidity Pool 4%, WCRO Rewards 2%, Team 1%)

  - **Sell Tax: 10%**
   (Liquidity Pool 1%, WCRO Rewards 5%, Team 4%)

  Maximum Tax Limit: 20%

Buy Tax 7%

Buyer 93% Liquidity Pool 4% WCRO Rewards 2% Team 1%

Sell Tax 10%

Seller 90% Liquidity Pool 1% WCRO Rewards 5% Team 4%

NFTs & NFT Marketplace

Non-fungible tokens (**NFTs)**

- CroKing NFTs: A collection of 3001 unique NFTs.
- CroQueen NFTs: A collection of 3001 unique NFTs.
- Secondary sales are listed on our own marketplace as well as Ebisu's Bay.
- CroKing & CroQueen sales on Ebisu's Bay have a 6% royalty, distributed as follows = 2% NFT Holders, 2% Buybacks & 2% Operations.

NFT Marketplace

- Allows whitelisted projects to list NFTs for secondary sale.
- NFT purchases made with $CRO.
- 2% base fee on sales.
- 2% is split 34% to NFT holders & 66% Team/Dev.
- Discount on the 2% base fee for NFT holders purchasing:
  - CRKNFT 20% discount of the 2%
  - CRQNFT 10% discount of the 2%
  - Pair 30% of the 2%

COIN FLIP

Coin Flip

- Coin flip is a simple game dating back to the Roman Empire, involving flipping a coin with only 2 possible outcomes: "Heads" or "Tails" – Originally known as Heads or Ships.

- CroKing have adapted this game to utilize smart contracts and blockchain technology, bringing a coin flip game into Web3.

- CroKing offers 2 options:
  - Flip for $CRK or
  - Flip for $CRO

- Players may choose their desired selection of heads or tails and bet between 1-1000 tokens ($CRO/$CRK) on their selection.

- A fee of 5% is collected for each game played

- This 5% is split:
  - 1/3 NFT Holders
  - 1/3 Buybacks
  - 1/3 Operations

CRK Boosted Staking & NFT Staking

Boosted $CRK Token Staking Feb 2024:
- Stake up to 20,000 $CRK in our unlocked pool to earn $WCRO + $WCRO rewards, or stake 30,000 $CRK in our locked pool to Earn $CRK + $WCRO rewards.
- Add up to 8 x NFTs to your staking pool to boost your earning potential up to 750% on the value of $CRK staked.

Locked Pool (Earn CRK):
- 3% getting released in a year = 98.6301369863013699 (~100 $CRK per day).
- Capped to 400,000 $CRK in total and 30,000 $CRK per wallet.

Unlocked Pool (earn $WCRO)
- 30,000 $WCRO released in a year.
- Capped to 20,000 $CRK per wallet.

Upcoming Unlocked Pool (Earn $ETH):
- 1 $ETH released in a year.
- No caps.

CRK Boosted Staking & NFT Staking

NFTs that can be added to each boosted staking pool:

- 2 x CroKing NFTs = 5% - 100% Boost Each.
- 2 x CroQueen NFTs = 5% - 100% Boost Each.
- 1 x CroKnight NFT = 5% - 100% Boost Each.
- 1 x Alpha Lions Rebooted (ALR) = 5% - 100% Boost.
- 1 x Alpha Lady Lions (ALL)= 5% - 100% Boost.
- 1 x Alpha Lions Customs (ALC) = 50% Boost.

NFT Solo Staking Pools Feb 2024:

- Stand-alone staking for NFTs (CroKing & CroQueen).
- Earn $CRK and $WCRO simultaneously.
- To avail of NFT staking pool rewards, users must hold (in wallet or staked):
  - Minimum 100 $CRK per NFT to receive NFT pool rewards.
- Examples:
  - 1 x NFT staked, but only 80 $CRK tokens held = No pool rewards until 100 $CRK is held or staked
  - 10 x NFTs staked, but only 950 $CRK tokens held = Pool rewards on 9 x NFTs

CRK Boosted Staking & NFT Staking

CroKing & CroQueen Ranking & Boosting %

- Rank 1-13 = 100% per NFT
- Rank 14-500 = 50% per NFT
- Rank 501-1250 = 25% per NFT
- Rank 1251-2000 = 15% per NFT
- Rank 2001-3001 = 5% per NFT

Alpha Lions Rebooted Ranking & Boosting %

- Rank 1-5 (15 NFTs) = 100%
- Rank 6-50 (135 NFTs) = 50%
- Rank 51-200 (450 NFTs) = 25%
- Rank 201-350 (450 NFTs) = 15%
- Rank 351-500 (450 NFTs) = 5%

Alpha Lions Customs Ranking & Boosting %

- All NFTs = 50%

Alpha Lady Lions Ranking & Boosting %

- Rank 1-5 = 100%
- Rank 6-50 = 50%
- Rank 51-250 = 25%
- Rank 251-500 = 15%
- Rank 501-748 = 5%

Alpha Lions Partnership

- CroKing receives a 2.5% royalty from secondary sales (Ebisu's Bay & Moonflow) on the 3 x Alpha Lion NFT collections.
- This royalty is allocated:
  - 1/3 NFT Holders
  - 1/3 Buybacks
  - 1/3 Operations
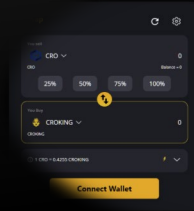

DEX Aggregator

Decentralized Exchange (DEX) Aggregator

- In the realm of decentralized finance (DeFi), a DEX Aggregator plays a crucial role. It is a platform that aggregates liquidity from various DEXs to facilitate the trading of cryptocurrencies. By doing so, it ensures that users receive the best possible trade execution with minimal slippage and optimized pricing.

- For CroKing's ecosystem, the inclusion of a DEX Aggregator signifies a significant advancement. Our aggregator operates on the Cronos blockchain adhering to the UniSwap V2 standards.

- Our Aggregator scans multiple DEXs within the Cronos network, analyzing numerous factors such as price difference, lower transactions fees, and finding the ideal trading pair via complicated algorithms to select the best possible provider for a given token swap.

- Our Aggregator fee is 0.15% this is allocated:
  - 1/3 NFT Holders
  - 1/3 Team
  - 1/3 Buy Backs

- The CroKing DEX Aggregator is a powerful tool that simplifies and improves the trading process for $CRK token holders and other users in the Cronos DeFi space.

Merchandise

Merchandise

- CroKing offers a range of merchandise for our community via BuddieLabs.com including hoodies, t-shirts and mugs.

- Merchandise is offered from 4 different locations (US/CAD, Europe, UK & Australia) to ensure that our community is provided with quality products and reasonable shipping costs.

- 20% of all sales are injected back into the CroKing ecosystem.

- This 20% is split:
  - 1/3 NFT Holders
  - 1/3 Buybacks
  - 1/3 Operations

FUTURE DEVELOPMENTS

- **King of Hearts**

- **CroKnight NFTs**

- **Token & Staking Factories**

- **DApp & NFT Marketplace V2**

King of Hearts

Concept

- A unique, blockchain-based card game integrated into the CroKing ecosystem that features a weekly 60% rollover jackpot prize pot along with other weekly side prizes. The game features 52 cards, including 4 x Aces, 34 x number cards, 4 x Queens, 3 x Kings, 4 x Jacks, 2 x Jokers and the jackpot-winning **King of Hearts** card. The game is played weekly until the **King of Hearts** card is found.
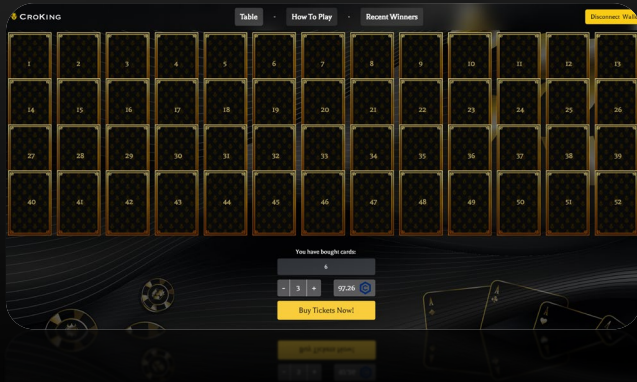

Gameplay

- The deck of 52 cards is created, shuffled and each card is placed randomly face down on the playing table. The shuffle process uses Witnet Randomness Oracle to ensure fairness. Players will choose where they think the King of Hearts card may be from the 52 randomly placed face-down/non-flipped cards on the table. Players will select the number of tickets they wish to purchase/bet on for the chosen card placement. Tickets will be purchased with $CRO for the value of $3 (USD) each. Each ticket is 1 x entry into an overall draw for 2 x winning tickets to be selected each week and have their card selection flipped on the table to win the associated prize. The game will be complete when the King of Hearts card is revealed.
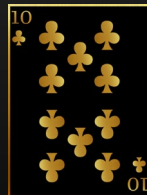

King of Hearts

Gameplay Example

- **A** player chooses the card position of "6" on the table by either tapping/clicking on the card or entering the card number "6" into the selection box. The player will then choose the quantity of tickets (1-100) for the selected card number "6".

- In this example, the player selects 3 x tickets to purchase on card "6". The player will click/tap "Buy Tickets Now" and will follow the on-screen instructions to sign the transaction to purchase the tickets.
  Each individual ticket (3) = 3 x entries into a randomly selected draw for that week.

King of Hearts

Winners Example

- As in the previous example, 1 of the 3 tickets the player has purchased is selected at random from the draw.
  The player's card choice, "6," is flipped on the table, revealing the 10 of Clubs, and the prize is automatically sent to the player's wallet.
  The winner will also receive notification of the win, the card revealed, and prize won when they connect their wallet to the DApp.

Random Draws

- Weekly draws will utilize Witnet Randomness Oracle for off-chain selection of the 2 x winning tickets each week to ensure they are conducted in a tamper-proof and unbiased manner.

King of Hearts

Main Game Prizes

- The King of Hearts card = The jackpot of 60% of all ticket sales rolled over each week.
- 7.5% of all ticket sales each week is allocated to all "other cards" prize pot and fortnightly wheel prizes.
- 65% of the 7.5% of weekly sales is allocated to a "other cards" prize pot, which rolls over each week after the "other cards" prizes are paid out on the below percentages:
  - The Joker (2) = 33% of prize pot
  - Aces (4) = 23% of prize pot
  - Jacks (4), Queens (4) & other Kings (3) = 18% of prize pot
  - Numbered cards (34) = 13% of prize pot

Fortnightly Wheel Prizes

- All players will also be entered into a wheel to win various prizes inc crypto, NFTs, IRL items, etc. This will be funded by the remaining 35% of the weekly 7.5%. Draws will be live midweek via CroKing Discord.

King of Hearts

Exclusive $CRK Holders Fortnightly Side Draw

- Eligibility: Hold minimum 350 x $CRK and have also purchased a game ticket.

- Draw Frequency: Conducted every 14 days.

- Winners: 2 winners per fortnightly draw.

- Prize Pool: 5% = 2.5% per week of the total contract balance is allocated to the winner of this draw, creating an additional incentive layer for loyal $CRK holders.

Dividend Contributions:

- 10% of all deposits are directed to the dividend tracker, enhancing $WCRO rewards for $CRK holders.

- An additional 3.5% of all deposits is allocated to NFT holders.

King of Hearts

King of Hearts % Breakdown

- 60% = King of Hearts Jackpot Card (Rollover)
- 3.5% = NFT Holders Rewards
- 6.8% = Team & Marketing
- 5% = Pooled for the next game

- 10% = $CRK Holders Rewards
- 7.5% = Other Cards & Wheel Draw Prize Pool
- 4.7% = Cash Reserves (staking and investments)
- 2.5% = Fortnightly $CRK holders side draw

CroKnight NFTs

CroKnight NFTs

- **Max Supply:** 3001

- **No of Trait Attributes:** 15

- **Utility:**
  - Solo $CRK Staking
  - $CRK Staking Booster
  - 1/3 Share of NFT Rewards (3.5%) from King of Hearts weekly ticket sales
  - 1/3 Share of other ecosystem NFT rewards

- **Airdrop Eligibility:**
  - Minimum requirement = 2 x Pairs (2 x CroKing & 2 x CroQueen NFT's) = 1 airdrop
  - Every 4 pairs thereafter = 1 additional airdrop
  - Example: 2 x pairs = 1, 6 x pairs = 2, 10 x pairs = 3 & so on

Artwork & traits of CroKnight NFTs preview may not be the final version

Token & Staking Factories

Token & Staking Factories

Token Factory:

- CroKing will offer a user-friendly platform that will enable individuals and projects to create their own ERC20 token.

- Users may choose to deploy an ERC20 token on any Ethereum Virtual Machine (EVM) chain, including Cronos, Binance Smart Chain, Fanton, Polygon, Avalanche, Cardano, etc.

Staking Factory:

- Projects can use our "Staking Factory" platform to create their own ERC20 – Token or ERC721 – NFT staking pools, adding utility to any token or NFT collection.

- The platform will support a variety of staking methods, catering to different project needs and investor preferences.

- Our NFT holders may add their NFTs on applicable pools, creating an additional layer of utility and value to the CroKing NFT range.

DApp & NFT Marketplace V2

DApp & NFT Marketplace V2:

- New user-friendly & refreshed DApp interface.

- Self-Service Creation: Projects can independently create and launch their NFT collections directly on our decentralized application (DApp).

- Automated Listing: The process of listing is streamlined, requiring no intervention from the CroKing team, ensuring efficiency and autonomy for project creators.

Conclusion

- CroKing stands as a testament to innovation and commitment in the evolving landscape of blockchain and DeFi.

- Our focus on building a robust, rewarding, and interactive ecosystem places us at the forefront of the Cronos blockchain revolution.

- We invite you to join us on this exciting journey as we continue to expand, innovate, and redefine the standards of digital finance and community engagement.
